DETAILED ACTION

Response to Amendment

1. The amendment filed 8/20/03 has been entered.

Claims 1,9 have been amended. Claims 25-33 have been newly added; no new matter has been introduced by the amendments. Claims 16-24 have been cancelled.

Claims 1-15 and 25-33 are under consideration.

Claim Rejections

2. All claims rejections presented in the earlier office action are withdrawn in view of the amendment and arguments.

Allowable Subject Matter

3. Claims 1-15, 25-33 is allowed.

4. The following is an examiner's statement of reasons for allowance:

The claims recite a method of trimming resist features. The surface ("top portion") of the patterned resist is modified such that the lateral trim rate is greater than the vertical trim rate.

Buynoski is assigned to the same assignee and not a valid reference. Ng does not teach differential etching in the vertical and lateral directions.

Other references cited below teach trimming a bilayered resist structure wherein the top layer has a lower etch rate than the underlayer (Yen, Yang). Alternatively the resist is hardened and isotropically trimmed to reduce equally the vertical and lateral dimensions of the features (Tsai, Yau). Jennison teaches modifying the resist properties by e-beam radiation to achieve an undercut in a lift-off process. It does not teach a

vertical etch rate slower than the lateral etch rate – the resist is hardened against vertical etching.

Mahorowalla teaches the elements of the instant claims, but is not prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

5. Applicant's arguments were considered in allowing the claims.
